

UK & EU CBAM

FREE Webinar No: 2 of 4

Practical understanding and insights
on navigating the Carbon Border
Adjustment Mechanism

Date: Wednesday 26th March 10am – 11am

CBAM

Welcome to the second 1-hour webinar in our CBAM series of events hosted by Auditel's dedicated CBAM advisory team. This is a must-watch webinar for anyone buying, selling or using metals in a production process.

In this session we will discuss the latest updates on UK & EU CBAM. We will also be sharing our insight on what is meant by direct and indirect specific embedded emissions.

We will review the tariff cost calculations and revisit Auditel's carbon maturity model that can guide you to becoming carbon competitive.

Following on from our first webinar we will put these topics into context with our case study on Perfect Storm Limited by discussing actions in obtaining data for calculations.

Once again this is an interactive webinar and will include an open questions and answers session to share current best practices on helping you navigating the Carbon Border Adjustment Mechanism.

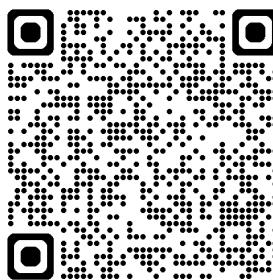

Speakers: Auditel CBAM Team

Nick Scull, Paul Harper, Munminder Gill
Jon Alford and Huw Williams
